Local

Freeway

- GloCo Outlier
- 2011-12? Looks worse on sparklines in some cases
- What's with 2015?
- Recent decline explainable?
- Peaks vs. Daily method is often similar shape but different numeric ranges.

Local

2011-12 pretty much out of the question

Steep peak to decline in 2016-17 explainable?

So much symmetry from county to county. Is that weird?

Peaks vs. Daily method is same shape but different numeric ranges.
